

FACILITIES MAINTENANCE AND PLANNING

The District will create and maintain a School Maintenance Plan that will provide *for* preventative *maintenance*, time table for such maintenance, and an inventory of all equipment and components in every building/facility owned by the District. The plan will delineate who is responsible for covering all aspects of the maintenance operations. The School Board directs the Supt. of Schools in cooperation with the Director of Facilities and Maintenance to manage this plan in an effective and efficient manner through the use of a computerized management system for all elements of the plan.
